# MINING WATER CANNONS

SPECIALISED SUPPORT EQUIPMENT

# ◀◀ REMOTE WATER CANNON

ETT's Mining Water Cannon is constructed from industrial grade stainless steel and high quality seals to ensure reliable operation in the most extreme environments. All materials are carefully selected for longevity and durability against the corrosive properties associated with mine water.

## FEATURES

1. Flow rate up to 4 500 L/min
2. Reach up to 70 metres
3. Electric joystick controller in cab
4. Sealed zero-maintenance seals and drive system inside greased swivel joints
5. Choice of electric or hydraulic drive motors
6. Motors drive heavy duty worm gears for precise control

# ◀◀ MANUAL WATER CANNON

The Manual Water Cannon offers a simple and extremely durable solution, using the same extra heavy duty pivot and sealing arrangements as the remote cannon. The cannon is controlled via a heavy duty stainless steel handle and manual control valve mounted at the base of the cannon.

## FEATURES

1. Flow rate up to 4 500 L/min
2. Reach up to 70 metres
3. Mounted on the roof of the tank
4. Easy control with cannon handle
5. Sealed zero-maintenance seals inside greased swivel joints
6. Tank roof can be fitted with railings for operator safety
7. Cannon swivels can be fitted with optional position locks to lock the cannon in a single direction

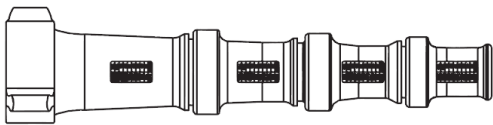

## NOZZLE OPTIONS

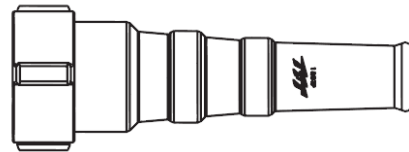

### STACK TIP NOZZLE

A modular nozzle system enabling a varied spray pattern by adding or changing nozzle segments. Offers the simplicity of a straight tip nozzle with the ability to customise your preferred spray pattern to suit your requirements.

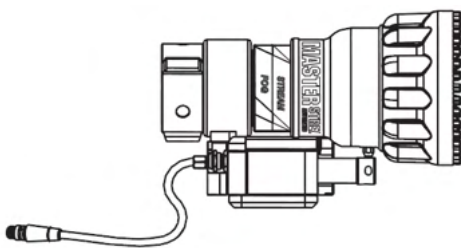

### STRAIGHT TIP NOZZLE

A simple nozzle offering long range and heavy water deposition. A popular choice for a maintenance-free cannon system that is simple to operate.

### ELECTRIC REMOTE ADJUSTABLE NOZZLE

Variable stream nozzle with electric pattern actuation.

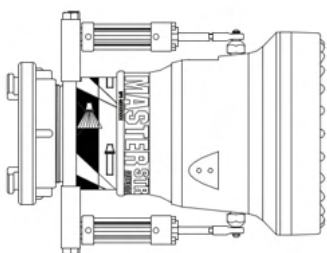

### MANUAL ADJUSTABLE NOZZLE

Variable stream nozzle with manual pattern actuation.

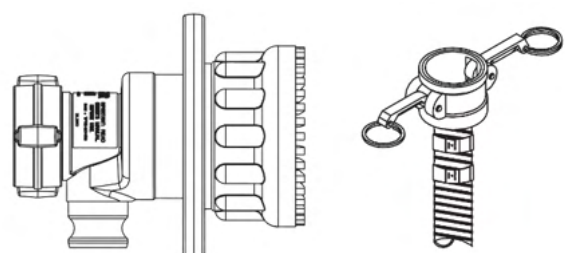

### HYDRAULIC REMOTE ADJUSTABLE NOZZLE

Variable stream nozzle with hydraulic pattern

### AFFF FOAM NOZZLE KIT - REMOTE

Foam Nozzle and hose kit including remote control foam switching.

## ◀◀ FOAM DELIVERY KIT

The ETT Foam Delivery Kit includes a foam tank with foam induction tube. Tanks are available for all ETT Water Tanker models as either a new fitment option, or a retrofit option.

# 25+

years' service  
in the harshest  
environments

ETT maintains a complete inventory of repair and maintenance parts for all of our products to include accessory kits and service parts packages. Our professionally trained team of engineers and support staff are focused on ensuring your asset's optimal performance and ultimately your satisfaction with ETT products.

Under our policy of continuous improvement, we reserve the right to change technical data and design without prior notice. Photographs featured in this brochure may include optional equipment.
